

MR[®] 400 Wetting agent

Product characteristics

- MR[®] 400 Wetting Agent is used to reduce the surface tension of aqueous magnetic particle testing agents and leads to a better wettability of the surface by the testing agent.
- MR[®] 400 wetting agent is a clear liquid and can be mixed with water as desired.
- Depending on the formulation and requirements, approx. 0.1-1.0% is used in the application concentration
- Non-labelling - ECO-LINE

Minimum shelf life / temperatures

Container: 1 year
Storage temperature: + 5 °C - + 45 °C
Application: + 5 °C - + 50 °C

Approvals / specification

- DIN EN ISO 9934-2
- ASTM E1444
- ASTM E709

More hints

The product MR[®] 400 can be added to the application medium, especially the magnetic powder suspension, to improve performance in special applications. It is important to stir the product MR[®] 400 thoroughly into the application medium before using with dry powder and only then add the magnetic powder, when using suspensions the sequence equalises. Make sure that the MR[®] 400 product is evenly distributed in the magnetic powder suspension. Although the main field of application is magnetic powder, it can also be used in other fields of application.
