

## REFLECON® BUILD PLATE CLEANER

500 ml

ADVANCED  
CLEANING  
FORMULA

### PRODUCT CHARACTERISTICS

- Even application ensures precise and economical use.
- The optimised formula guarantees thorough cleaning and effectively removes even stubborn residues without leaving any traces.
- Ready to use – no decanting required.
- No dirty hands and no spills – just spray on, wipe off and you're done!
- The spray volume can be precisely adjusted to different surfaces and applications by varying the pressure on the valve.
- Fast drying reduces downtime between printing jobs.
- A perfectly cleaned build plate improves the adhesion of 3D prints
- Extends the service life of the print bed: Regular cleaning prevents deposits and maintains surface quality.
- Ideal for professional and private users: Suitable for both industrial printing environments and hobby use.

### NOTES

#### Storage conditions and shelf life:

Store the aerosol can upright and dry at temperatures between 5 and 45 °C. The shelf life is at least 3 years under optimal storage conditions. The processing temperature is between -10 °C and +50 °C. At temperatures below -10 °C, changes in consistency may occur, which will return to normal at temperatures above -10 °C.

#### Packaging sizes:

Available in 500 ml aerosol cans  
(12 cans per box | minimum order quantity: 12 cans).
