

Magnetic Particle Inspection

Product information
MR[®] 400 Wetting agent

MR[®] 400 Wetting agent

additive for aqueous magnetic powder suspensions

General appearance and composition:

- MR[®] 400 Wetting agent serves for the diminishing of surface tension of aqueous magnetic powder suspensions which improves the wettability of the surface to be tested
- MR[®] 400 Wetting agent is a clear liquid which is mixable with water according to the customer's needs
- No declaration of hazardous ingredients – ECO-LINE

Application:

- Additive for the preparation of aqueous magnetic powder suspensions
- Most water dispersable MR[®]-Magnetic powder concentrates already contain MR[®] 400 Wetting agent, but it can be added to the preparation if needed
- Depending on your needs, add 0,1-0,3% to the aqueous magnetic powder suspension

Minimum shelf life:

- will keep for a minimum of 4 years, stored at room temperature

Pack sizes:

- 10 kg
