Product information

MR[®] 3001 Universal Cleaner (concentrate)

MR[®] 3001 Universal Cleaner (concentrate)

as precleaner for Penetrant Testing acc. to EN ISO 3452-1
and other applications

Product description

Environmentally friendly remover for metallic surfaces, free of solvents, acids and low content of phosphate. The product is better, more effective and less harmful to the environment than conventional cleaners. Already on its way from the cleaning area to the separator the cleaning solution separates into the aqueous and oil containing phase.

MR[®] 3001 solves many waste water problems. It is a non-combustible, mild-alkaline cleaning agent with very good degreasing and cleaning effect.

Applicable on metallic surfaces, workshop floors, machinery, tanks, ships, etc.

Application

Dilution ratio with water:

- Metallic surfaces: 1:3 up to 1:100
- Workshop floors: 1:10 up to 1:100

pH-value: 9,5 (1% aqueous solution)
10,2 (concentrate)

More than 90 % of the contained surfactants are biodegradable according to the requirements of „RVO“ for the German „Wasch- und Reinigungsmittelgesetz“ as well as the regulations of the German „Tensidverordnung“ (TensVO) dd. 04.06.1985.

The cleaner does not contain any organic halogens (AOX).

Minimum shelf life:

- 2 years, storage temperature 2 to 50 °C. Protect against frost!

Pack sizes:

- 1 kg
- 11 kg
