Product information
Spray gun PN2A

Spray gun PN2A with beaker

for connection to compressed air

Art. No. G59-D L

This spray gun is suitable for application of:

- Developers and penetrant at Penetrant Testing
- Contrast paints for Magnetic Particle Inspection
- Anti reflection media at optical 3D measurement

The advantages:

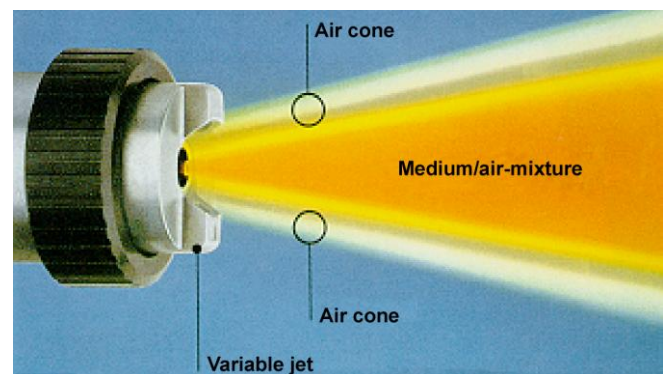

- Uniform coating
- Less paint mist
- Adjustable for flat, diffuse or round jet
- Infinitely variable low pressure
- Easy handling and precise operations
- Robust and long lifetime

Because of low drizzling of medium consumption of medium will diminish up to 40 %.

Scope of delivery:

- spray gun PN2A
- with 3 nozzles \varnothing 1,0/1,5/2,0 mm
- heat insulated handle
- beaker made of Aluminium 0,7 l Inhalt

Notice: For usage a pressure of 1,8 bar is necessary!
