

## MR<sup>®</sup> Spray gun PN 2A with beaker

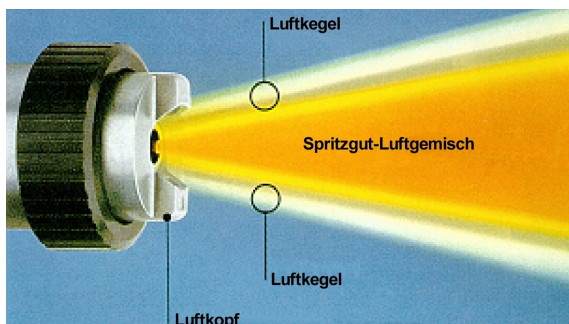

### Product characteristics

- For connection to compressed air (pressure max. 0.4 bar / with pressure transducer 2.5 - 4 bar)
- Suitable for application of:
  - Developers and penetrants at Penetrant Testing
  - Contrast paints for Magnetic Particle Inspection
  - Anti reflection media at optical 3D measurement

### Advantages

- Absolutely oil- and condensate-free air for perfect film application
- Air head can be rotated for flat, wide and round jets
- Low-pressure spraying process for low paint mist and material savings
- Stepless electronic air volume and pressure control
- Easy handling and precise guidance
- High robustness and long service life

### Scope of delivery

- Spritzpistole PN 2A (Art.-Nr. G59-D L)
- 3 nozzles 1,0 / 1,5 / 2,0 mm Ø
- Heat insulated handle
- Aluminium beaker 0,7 l content
- Pressure transducer for spray gun PN 2A
