- ✓ for oil or water based test equipment

GENERAL INFORMATION

DELTA FLUX was founded in 1992 by a team of engineers and salesmen from the magnetoscopy industry. They have a strong know-how in development and design of multifunctional magnetic particle test benches and equipment. To complete the NDT portfolio, MR Chemie takes over the responsibility for the global sales activities for DELTA Flux test benches, equipment and accessories for magnetic particle testing with immediate effect.

Each request is handled individually in order to develop and offer a customized solution.
