

## UV safety glasses

### Product characteristics

- For work under UV light in penetrant and magnetic particle inspection, can be worn over many types of spectacles.
- Comfortable over-glasses with unrestricted side vision
- Effective indirect ventilation due to special temple design with large side shields
- Frosted roof area to suppress reflections

### Note

The DGZfP/BGFE leaflet EM06 specifies the protection level 2-1.4 according to DIN EN 170. Spectacles that comply with this protection level are equipped with tinted lenses. However, tinted lenses are not permitted according to the standard DIN EN ISO 3059:2013-3 (viewing conditions penetration and magnetic particle testing). According to the DGZfP statement, the protection level will be corrected in the next version of EM06. UV protective goggles with protection level 2-1.2 can be used.
